More Bad

what a hassle
More Bad

what a stupid hassle
More Bad

seriously a fucking hassle
More Bad

this is a fucking hassle
Again Bad

18c3f84  Huge commit
c1c38fc

Update deploy recipe with some stuff. I dunno. It's late.
The Good
Updated basic auth prompt to reflect app name
Good

950b8de Fixed password reset for users who use the same email on multiple accounts [Fixes #11102389]
Added an extra 10s while sleeping after a Twitter rate-limit error

* Twitter isn't always ready immediately after sleeping the advertised amount of time.
Fixed bug related to contact syncing [#9190663]

Contacts that should have been tagged both friend and follower were having those tags toggled on each #profile_sync run.

If the contact had "follower", and profile_sync was run, then the code would set the system_tags to ["following"], blowing away the "follower" tag.

It would do the same thing vice versa for the "following" system tag.
Moved all static pages into a generic PagesController [Finishes #6375]

* Cleaned up the routes
* Simplified static page creation
Moved all static pages into a generic PagesController [Finishes #6375]
