hassle

Again Bad

18c3f84 Huge commit

Huge Whoops More Again Serious Hassle Bad

c1c38fc

Update deploy
recipe with some
stuff. I dunno.
it's late

The Good

Good

0835022

Updated basic
auth prompt to
reflect app name

Good

950b8de Fixed password reset for
users who use the same
email on multiple accounts
[Fixes #11102389]

More Good

3224fff Added an extra 10s while sleeping
after a Twitter rate-limit error

- * Twitter isn't always ready immediately after sleeping the advertised amount of time.

334a2c4 Fixed bug related to contact syncing [#9190663]

Contacts that should have been tagged both friend and follower were having those tags toggled on each #profile_sync run.

If the contact had "follower", and profile_sync was run, then the code would set the system_tags to ["following"], blowing away the "follower" tag.

It would do the same thing vice versa for the "following" system tag.

Template

Moved all static pages to a generic
PagesController [Resolves #6375]

"VENDOR EVERYTHING"

– Chris on March 27, 2007

Seriously. You'll thank me later.

What do I mean, exactly? Well, let's say you're working on a small Rails team. You decide to start using `test/spec`. Be dee dee. As usual, you `gem install test-spec` then `Pistonize` the plugin. You start writing specs and begin converting existing tests to specs. You're on a tear. Nothing can stop you. Behavior is king. You commit your changes.

You break the build.

What? Why? Well, all your new specs depend on the `test-spec` gem, a gem your comrades and `continuous integration builder` do not have.

Quickly: fix it! Tell everyone to install the gem locally. Install the gem on your staging server. Carefully install the gem on your production server. Phew. Everyone's got the same version, right? Right. Well, maybe. (At least the build works.)

vendor/gems
config.gem

WHY?

*Check in your
.rvmrc*

rvm ruby-1.9.2

RVM Gemsets Are Overrated

Let Bundler Follow the --path

```
$ bundle install --path vendor  
$ echo 'vendor/ruby' >> .gitignore
```

Package Your Gems in vendor/cache

```
$ bundle package
```

Help!

```
alias b="bundle"
alias bi="b install --path vendor"
alias bu="b update"
alias be="b exec"
alias binit="bi && b package && echo 'vendor/ruby'
           >> .gitignore"
```

Summary

```
$ bundle install --path vendor  
$ bundle package  
$ echo 'vendor/ruby' >> .gitignore
```

CoffeeScript

A little language that compiles into JavaScript

Ryan McGeary
<http://ryan.mcgeary.org>
@rmm5t

Jeremy Ashkenas

~~JavaScribt's less
ostentatious brother~~

*one-to-one
with JavaScript*

*better
functional syntax*

*compiles to
the good parts*

**CoffeeScript is
an attempt to
expose the good
parts of
JavaScript in a
simple way.**

<http://jashkenas.github.com/coffee-script/>

JavaScript

```
if (typeof elvis !== "undefined" && elvis !== null) {  
    alert("I knew it!");  
}
```

```
alert "I knew it!" if elvis?
```

JavaScript

```
var cube, square;  
square = function(x) {  
    return x * x;  
};  
cube = function(x) {  
    return square(x) * x;  
};
```

```
square = (x) -> x * x
cube   = (x) -> square(x) * x
```

JavaScript

```
var _i, _len, _ref, _result, food, lunch;
lunch = (function() {
  _result = []; _ref = ['toast', 'cheese', 'wine'];
  for (_i = 0, _len = _ref.length; _i < _len; _i++) {
    food = _ref[_i];
    _result.push(eat(food));
  }
  return _result;
})();
```

```
lunch = (eat food for food in ['toast', 'cheese', 'wine'])
```

JavaScript

```
var _i, _j, _len, _len2, _ref, _ref2, roid, roid2;
_ref = asteroids;
for (_i = 0, _len = _ref.length; _i < _len; _i++) {
    roid = _ref[_i];
    _ref2 = asteroids;
    for (_j = 0, _len2 = _ref2.length; _j < _len2; _j++) {
        roid2 = _ref2[_j];
        if (roid !== roid2) {
            if (roid.overlaps(roid2)) {
                roid.explode();
            }
        }
    }
}
```

```
for roid in asteroids
  for roid2 in asteroids when roid isnt roid2
    roid.explode() if roid.overlaps roid2
```

Installation

```
$ brew install node  
$ curl http://npmjs.org/install.sh | sh
```

```
# Add /usr/local/share/npm/bin to PATH
```

```
$ npm install coffee-script
```

Usage

```
$ coffee -c path/to/script.coffee  
  
$ coffee --watch experimental.coffee  
  
$ coffee --print *.coffee > all.js
```

Significant Whitespace

```
if happy and knowsIt  
  clapsHands()  
  chaChaCha()  
else  
  showIt()
```

Significant Whitespace

```
if (happy && knowsIt) {  
    clapsHands();  
    chaChaCha();  
} else {  
    showIt();  
}
```

JavaScript

Functions

```
square = (x) -> x * x
```

```
area   = (x, y) -> x * y
```

```
noop   = ->
```

Functions

```
var area, noop, square;  
square = function(x) {  
    return x * x;  
};  
area = function(x, y) {  
    return x * y;  
};  
noop = function() {};
```

JavaScript

Objects

```
kids =  
  brother:  
    name: "Max"  
    age: 11  
  sister:  
    name: "Ida"  
    age: 9
```

»»»

```
var kids;  
kids = {  
  brother: {  
    name: "Max",  
    age: 11  
  },  
  sister: {  
    name: "Ida",  
    age: 9  
  }  
};
```

Lexical Scoping / Variable Safety

```
outer = 1
change = ->
  inner = -1
  outer = 10
inner = change()
```

```
(function() {
  var change, inner, outer;
  outer = 1;
  change = function() {
    var inner;
    inner = -1;
    return (outer = 10);
  };
  inner = change();
}).call(this);
```

OOP

```
class Animal
  constructor: (@name) ->
    move: (meters) ->
      alert @name + " moved " + meters + "m."
    class Snake extends Animal
      move: ->
        alert "Slithering..."
        super 5
    sam = new Snake "Sammy the Python"
    sam.move()
```

OOP

```
var Animal, Snake, sam;
var __extends = function(child, parent) {
    var ctor = function() {};
    ctor.prototype = parent.prototype;
    child.prototype = new ctor();
    child.prototype.constructor = child;
    if (typeof parent.extended === "function") parent.extended(child);
    child.__super__ = parent.prototype;
};
Animal = function(_arg) {
    this.name = _arg;
    return this;
};
Animal.prototype.move = function(meters) {
    return alert(this.name + " moved " + meters + "m.");
};
Snake = function() {
    return Animal.apply(this, arguments);
};
__extends(Snake, Animal);
Snake.prototype.move = function() {
    alert("Slithering...");
    return Snake.__super__.move.call(this, 5);
};
sam = new Snake("Sammy the Python");
sam.move();
```

JavaScript

Pattern Matching

```
theBait    = 1000  
theSwitch = 0
```

```
[theBait, theSwitch] = [theSwitch, theBait]
```

```
weatherReport = (location) ->  
[location, 72, "Mostly Sunny"]
```

```
[zip, temp, forecast] = weatherReport "20175
```

Pattern Matching

```
var _ref, forecast, temp, theBait, theSwitch, weatherReport, zip;  
theBait = 1000;  
theSwitch = 0;  
_ref = [theSwitch, theBait];  
theBait = _ref[0];  
theSwitch = _ref[1];
```

```
weatherReport = function(location) {  
    return [location, 72, "Mostly Sunny"];  
};  
_ref = weatherReport("20175");  
zip = _ref[0];  
temp = _ref[1];  
forecast = _ref[2];
```

JavaScript

String and RegExp Interpolation

```
quote  = "A picture is a fact."  
author = "Wittgenstein"  
phrase = "#{quote} -- #{author}"  
  
sentence = "#{ 22 / 7 } approximates π"  
  
sep    = "[.\\\\`\\- ]"  
dates  = /\d+#{sep}\d+#{sep}\d+/g
```

String and RegExp Interpolation

```
var author, dates, phrase, quote, sentence, sep;  
quote = "A picture is a fact.";  
author = "Wittgenstein";  
phrase = ("" + (quote) + " -- " + (author));  
  
sentence = ("" + (22 / 7) + " is a decent approximation of π");  
  
sep = "[.\\"\\\"- ]";  
dates = (new RegExp("\\"d+" + (sep) + "\\"d+" + (sep) + "\\"d+", "g"));
```

JavaScript

Array and Object Comprehensions

```
foods = ['toast', 'cheese', 'wine']
lunch = (eat(food) for food in foods)
```

```
yearsOld = max: 10, ida: 9, tim: 11
ages = for child, age of yearsOld
  "#{child} is #{age}"
```

Array and Object Comprehensions

```
var _i, _len, _ref, _result, age, ages, child, food, foods, lunch, yearsOld;
var __hasProp = Object.prototype.hasOwnProperty;
foods = ['toast', 'cheese', 'wine'];
lunch = (function() {
    _result = []; _ref = foods;
    for (_i = 0, _len = _ref.length; _i < _len; _i++) {
        food = _ref[_i];
        _result.push(eat(food));
    }
    return _result;
})();

yearsOld = {
    max: 10,
    ida: 9,
    tim: 11
};
ages = (function() {
    _result = []; _ref = yearsOld;
    for (child in _ref) {
        if (!__hasProp.call(_ref, child)) continue;
        age = _ref[child];
        _result.push("'" + (child) + " is " + (age));
    }
    return _result;
})();
```

JavaScript

Function Binding

```
Account = (customer, cart) ->  
  @customer = customer  
  @cart = cart
```

```
$( '#checkout' ).bind 'click', (event) =>  
  @customer.purchase @cart
```

J482LTA

Function Binding

```
var Account;  
var __bind = function(func, context) {  
    return function(){ return func.apply(context, arguments); };  
};  
Account = function(customer, cart) {  
    this.customer = customer;  
    this.cart = cart;  
    return $('#checkout').bind('click', __bind(function(event) {  
        return this.customer.purchase(this.cart);  
    }, this));  
};
```

How We Use MongoDB at BusyConf

*Making great
conferences even better*

busyconf.com

*Ryan McGeary
Jim Garvin*

The image shows a desktop browser window and a smartphone both displaying the RubyConf 2010 schedule. The browser window title is "RubyConf 2010 (powered by BusyConf)". The schedule is organized by day (Thu 11 Nov, Fri 12 Nov, Sat 13 Nov) and room (Room 1, Room 2, Room 3). The smartphone screen shows a simplified version of the same schedule, likely a mobile application interface.

RubyConf 2010 Schedule (BusyConf powered by BusyConf)

Thursday, November 11

- 10:15am (45m) **Dave Thomas - Keynote** Dave Thomas
Location: Ballroom
- 11:00am (25m) **Break** Location: Hallway
- 11:25am (45m) **Extreme Performance with Mirah and Dubious** John Woodell
- 12:15pm (45m) **RubyGems To All JVM Languages** Yoko Harada
- 1:00pm (1h 15m) **Lunch** Location: TBD
- 2:15pm (45m) **Ruboto: Ruby in your Pocket** Daniel Jackoway
- 3:10pm (45m) **Self-Contained, Source-Free, Executable Ruby Applications with Warbler** Nick Sieger

Friday, November 12

- 11:25am (45m) **History of RDoc and RubyGems** Eric Hodel
- 12:15pm (45m) **RubyConf Day 2** Yoko Harada
- 1:00pm (1h 15m) **Lunch** Location: TBD
- 2:15pm (45m) **Anthropology of RubyGems** Jeremy Lain
- 3:10pm (45m) **Each: A Brief History** Henrichs

Saturday, November 13

- 11:00am (25m) **Break** Location: Hallway
- 11:25am (45m) **Extreme Performance with Mirah and Dubious** John Woodell
- 12:15pm (45m) **History of RDoc and RubyGems** Eric Hodel
- 1:00pm (1h 15m) **Lunch** Location: TBD
- 2:15pm (45m) **Anthropology of RubyGems** Jeremy Lain
- 3:10pm (45m) **Each: A Brief History** Henrichs
